## **New MoonSkins™ iPhone 4 Covers Shine Among the Stars!**

### ***MoonSkins Cover Chosen as Exclusive Accessory for the 53rd Annual GRAMMY® Awards Gift Bag***

(Los Angeles) Feb. 11, 2011 – The afterglow of a great performance is waiting for you, too! MoonSkins™ (<http://www.moonskins.com>), a new stylish cover for the Apple® iPhone 4 with a special shine capability that glows all night long, will make its debut as the official accessory of the 53rd Annual GRAMMY® Awards Gift Bag. MoonSkins will be available to the public for \$29.99 on February 14 at [www.moonskins.com](http://www.moonskins.com).

The Grammy Awards ([www.grammy.com](http://www.grammy.com)) celebrate the musical accomplishments of artists in every field and are considered the most important music awards show of the year. This year's event, on Feb. 13 at Staples Center in Los Angeles, will feature musical performances from Mick Jagger, Barbra Streisand and all five Album of the Year nominees: Arcade Fire, Eminem, Lady Antebellum, Lady Gaga and Katy Perry.

Inspired by the soft glow of the full moon, MoonSkins are made of a space-age polymer with advanced photoluminescent technology that works like a battery by storing light and then releasing it as a bright luminance in the dark. This lighting effect is similar to the luminance of the moon, which inspired the brand name. MoonSkins come in nine florescent daytime colors that have their own unique night shine. As the moon relies on the sun, the MoonSkins cover needs light to shine. About 10 minutes of exposure to ambient light gives a MoonSkin cover the energetic charge it needs to shine all night long.

The new MoonSkins are designed to perfectly fit an iPhone 4 with matching port openings that allow you to plug in headphones and a charger without

removing the cover. Volume and home buttons are covered to protect your phone without hindering performance.

MoonSkins covers for the Apple iPhone 4 for Verizon will be available soon.

### **About MoonSkins**

MoonSkins are designed and manufactured by Southern California-based GlowZone, Inc. (<http://www.glowzone.com>) in partnership with Visible 24/7 Ltd. (<http://www.visible247.com>) MoonSkins are the result GlowZone's years of experience in industrial and high performance photoluminescence combined with the brilliant color technology owned by UK-based Visible 24/7 Ltd.

These high performance photoluminescent materials are so effective that they are used in emergency systems worldwide including egress systems at leading locations, including John Wayne Airport in Santa Ana, Calif. and the Time Warner Building in New York City and are used on the personal safety gear of emergency workers including firefighters (see [glowzone.com](http://www.glowzone.com)).
